

Fund Objective

The Shelton International Select Equity Fund seeks to achieve long-term capital appreciation.

Strategic Overview

The fund seeks to achieve long-term capital appreciation by investing in a concentrated portfolio of 30-50 stocks using a proprietary process that focuses on identifying companies that generate superior and consistent internal returns on capital in order to create shareholder value. The fund invests primarily in mid-to-large cap foreign equity securities.

Performance of a \$10,000 Investment - Institutional Shares¹

A hypothetical initial investment of \$10,000 on 7/18/2016, the inception date of SISEX, net of fees and including reinvested dividends, would have grown to \$20,711 as of 6/30/2025. The information above shows the performance of Institutional shares only.

All performance figures reflect an expense reimbursement. Without the expense reimbursement, the performance figures would be lower. Performance figures represent past performance and are not a guarantee of future results. The investment return and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost; current performance may be lower or higher than the performance data quoted. All time periods greater than one year are annualized. For more current month-end Fund performance information, please call our office at (800) 955-9988. *Performance inception date: 07/18/16

DEFINITIONS AND IMPORTANT INFORMATION

Beta: Beta measures the fund's sensitivity to market movements as defined by its benchmark; beta greater than 1 is more volatile than the market, while beta less than 1 is less volatile than the market.

R-squared: R-squared represents the percentage of the fund's movements that can be explained by movements in its benchmark.

Information ratio: Information Ratio is a ratio of the fund's returns above those of its benchmark compared to the volatility of those returns.

Sharpe Ratio: Average return earned in excess of the risk-free rate per unit of volatility or total risk.

Standard deviation: Standard Deviation measures the volatility of the Fund's returns; higher deviation represents higher volatility.
