

Fund Objective

The Fund's investment objective is to seek capital appreciation and income.

Fund Information

	Share Price	30-Day SEC Yield
DEBIX (Institutional)	\$10.35	7.18%
DEBTX (Investor)	\$10.26	6.95%

Yield and coupon are composites for the Fund's holdings and do not represent distributions by the Fund.

Performance of \$10,000 Investment - Institutional Shares¹

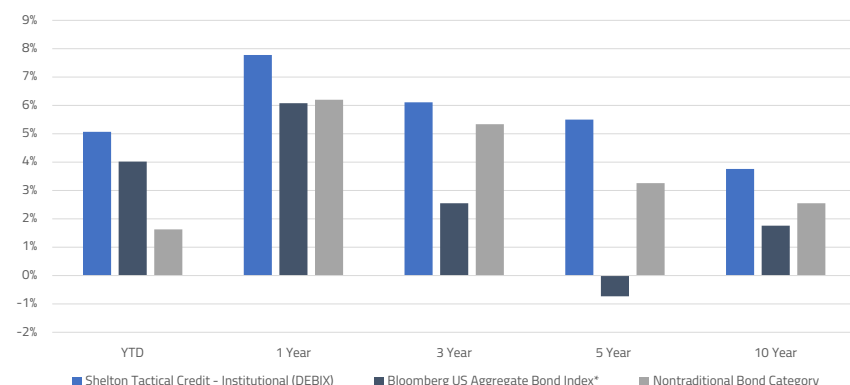

A hypothetical initial investment of \$10,000 on 12/12/2013, the inception date of DEBIX, net of fees and including reinvested dividends, would have grown to \$15,621 as of 6/30/2025. The information above shows the performance of Institutional shares only.

Overall Morningstar Rating™

★★★★ DEBIX

Received Morningstar Rating™ of 4 stars among 257 funds in the Nontraditional Bond category based on risk adjusted returns as of 6/30/2025.*

Investment Approach

- The Fund seeks to optimize investor returns by increasing the opportunity set to tactically invest across all macro, credit, and interest rate cycles
- Employs fundamental credit analysis seeking to identify bonds that are undervalued by the market
- The Fund seeks uncorrelated excess return and diversification when added to a typical fixed income portfolio

Strategy Advantages

1. Total return mindset to capture income and price appreciation
2. Low correlation to the Bloomberg US Aggregate Bond Index and other Fixed Income products
3. Skilled team with over 75 years of research and trading experience in focus asset classes

A Focus on Total Return

Expenses

	DEBIX	DEBTX
Gross	1.18%	1.43%
Net	0.74%	0.99%

The Fund's Advisor, Shelton Capital Management (the "Advisor"), has contractually agreed to reimburse expenses incurred by the Fund to the extent that total annual fund operating expenses (excluding acquired fund fees and expenses, certain compliance costs, interest and broker expenses relating to investment strategies (including commissions, mark-ups and mark-downs), leverage interest, other transactional expenses, annual account fees for margin accounts, taxes (such as income and foreign withholding taxes, stamp duty and deferred tax expenses), and extraordinary expenses such as litigation or merger and reorganization expenses, for example) exceed 0.73% and 0.98%, for the Institutional and Investor class shares, respectively, until May 1, 2026.

Shelton Tactical Credit Fund

Portfolio Management Team

Peter Higgins, Head of Fixed Income & Sr. Portfolio Manager

Peter Higgins has over 25 years of experience in fixed income investing, most notably as Partner and Lead Portfolio Manager at both Ares Management and BlueBay Asset Management. Previously, Peter specialized in global leveraged finance at investment banks such as Deutsche Bank AG, Goldman Sachs & Co. and Credit Suisse in both London, England, and New York City. Peter earned a bachelor's degree in Economics-Political Science from Columbia University.

Jeffrey Rosenkranz, Portfolio Manager

Jeffrey Rosenkranz has over 25 years of experience investing in the credit markets, with an emphasis in high yield, distressed debt, and special situations and has worked at firms including Cedar Ridge Partners, LLC, Durham Asset Management, Cooperstown Capital Management and Ernst & Young LLP. He holds an MBA from the Stern School of Business at New York University and a B.A. from Duke University. He is also a Certified Public Accountant.

William Mock, Portfolio Manager

William Mock has over 25 years of experience as a trader and portfolio manager of fixed income and derivatives portfolios, working at Citibank, Societe Generale, and TKI Capital prior to joining Shelton Capital in 2010. He is also a portfolio manager of Shelton Capital's other municipal and government bond mutual funds. William holds a B.S. in Electrical Engineering from Kansas State University and an MBA from University of Chicago Booth School of Business.

Chris Walsh, Portfolio Analyst

Chris Walsh has over ten years of experience analyzing credit and equity markets. He has been with Shelton Capital since November 2016. Chris earned a B.A. in Economics, Villanova University.

*The fund's Morningstar three-, five-, ten-year ratings respectively, 3 stars, 4 stars, 4 stars among 257, 233, 165 funds.

The Morningstar Rating[™] for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Mutual fund investing involves risk, including possible loss of principal. Credit-related instruments typically decrease in value when interest rates increase. Concentration in a small number of issuers increases the risk that one issuer could have a large adverse impact on the Fund's return. Borrowing and frequent trading could increase the Fund's operating expenses. High-yield bonds involve greater risk of default, and may be more volatile and less liquid, than investment grade securities. Subordinated and unsecured loans may be disproportionately affected by default and downgrade. Foreign investments may be adversely affected by currency fluctuations, lower liquidity, tax regulation, and political instability. Derivatives can be highly illiquid and difficult to unwind. The Fund's short positions may equal up to 100% of the Fund's net asset value. Short sales theoretically involve unlimited loss potential since the market price of securities sold short may continuously increase.

Distributed by RFS Partners, a member of FINRA, and affiliate of Shelton Capital Management.

The Bloomberg U.S. Aggregate Bond Index is an unmanaged index of the U.S. dollar-denominated investment grade fixed-rate taxable bond market. It includes government, corporate, mortgage-backed, and asset-backed debt securities with a maturity of at least 1 year. It is not possible to directly invest in an index.

3 Calculated as the sum of dividends excluding capital gain distributions over the previous 12 months divided by 6/30 NAV

4 Sum of % of Market Value

5 Bloomberg Industry Codes

SEC Yield is an annualized rate derived by dividing the fund's net investment income over a 30-day period by its offering price on the last day of the period. The net figures reflect the expense limitation agreement while the gross figures do not. The Fund's actual distribution rate may differ from its SEC Yield.
